Positions Open:

Biodynamic VEGETABLE SEED Internship With Whole Farm Approach

2023 Spring through December*

(shorter term hands on farm experience option, ask!)

**(Applicants considered throughout the year if there are openings)*

Focal points of MHLEF experience: Organic and Biodynamic farming on 500 plus acres. We are NOP organic and Demeter certified Biodynamic® with intensive horticultural production on 4 acres with a focus on vegetable seed production integrated into a year round CSA/Market vegetable garden. Activities include field preparation, cultivation growing, harvesting, threshing, cleaning, and packing seed for web sales. We have a grass fed micro dairy with intensive grazing for small herd of Ayrshire/Shorthorn/Jersey/Normande cow herd. Included in the internship is learning about our cows in relation to the farm's fertility for the seed, our micro dairy and grazing as well as small grain growing.

COME VISIT: Annual SEED Fest over labor day weekend: email for schedule

2023 Autumn Seed Internship processing and marketing: Three to Four

month internship: September-December: Harvesting in September, cleaning and testing and learning about seed distribution throughout September-December. While you will learn much more of the context of seed if you come in the early spring, we offer the autumn internship for experienced farmers or gardeners who do not have the time to come during the year.

For questions or more information: Interested applicants please send short bio, resume, reasons for your interest and goals regarding agriculture to bcorymb@gmail.com and call to let us know that you have sent it. 308-631-5877.
